Dear [Redacted]

As a user who requires TEMPEST Accredited personal computers, I would like to introduce you to the LORAL 3100T COMPAQ PORTABLE 286[®] Personal Computer. The high-performance TEMPEST Accredited portable from Compaq, the world's leading portable computer manufacturer.

And it's available right now--complete with features every security-sensitive user will need for years to come.

No other TEMPEST Accredited personal computer, desktop or portable, gives users more speed and power than the high-performance LORAL 3100T COMPAQ PORTABLE 286. It also offers true compatibility with the most popular hardware and software written for industry-standard personal computers.

One of the many features that set it apart from the PC you are currently using is its removable 20-Megabyte fixed disk drive. This self-contained unit offers twice the removable storage of most TEMPEST Accredited personal computers, and the fixed disk drive can be put in a secured location when not in use.

And just think, there are two additional storage devices: A 1.2-Megabyte or 360-Kbyte diskette drive and an internal fixed disk drive tape backup system that protects data on pocket-sized cartridges that hold up to 10 Megabytes.

It's the only TEMPEST Accredited portable with an 80286 microprocessor.

Operating at 8 MHz, the high-performance LORAL 3100T COMPAQ PORTABLE 286 runs the most popular business software up to 30% faster than PC's running at 6 MHz. With that kind of speed it's also ideally suited for networking/multitasking, windowing and multiuser environments.

The high-performance LORAL 3100T COMPAQ PORTABLE 286 is also perfect for handling large data bases, spreadsheets and complex CAD programs with room to spare for additional applications such as

DCI
EXEC
REG

project management software.

And with the optional 80287 math coprocessor, it runs complex programs with ease, especially those that are number-intensive. Moreover, with high-resolution text and graphics on one screen, you eliminate the need for a second monitor.

What other full-function, TEMPEST Accredited portable personal computer gives you shock-mounted storage devices to help prevent data loss? Or is engineered with the Compaq Computer Corporation worldwide reputation for uncompromising quality? Only the high-performance LORAL 3100T COMPAQ PORTABLE 286 Personal Computer, of course.

See for yourself how, on the road or in the office, you can make your secure working environment more productive. Why users who know, prefer COMPAQ Personal Computers.

Call right now for a FREE product demonstration or to receive additional information. If you prefer, write to me using the enclosed reply card and postage-paid envelope.

The TEMPEST Accredited LORAL 3100T COMPAQ PORTABLE 286 complies with NACSIM 5100A standards and is listed on the Preferred Products List under LORAL Electro-Optical Systems. It's everything a TEMPEST computer user could hope for...and more. Call today Toll-FREE! 1-800-237-4074 and ask for operator 45.

Respectfully yours,

Joseph B. Bog
Director of Government Marketing
